We are each a vital piece of the puzzle. Your Auxiliary, our Department and National Organization couldn't function without your continued support. We are stronger together.

I watched a movie the other night where a student was talking about tensile strength. He had uncooked spaghetti noodles and was able to break one easily. However, when he bunched them together, he was able to support the weight of a child's truck on them. By ourselves we can get discouraged and feel there is nothing we can accomplish but when we work together, we can accomplish amazing things.

If we each just recruited one member we would double our membership. Last month we looked at recruiting family but don't forget about your next-door neighbor, the person that sits next to you in church, that works next to you, or that you meet as you are out and about. Just ASK – maybe they'll say no but they could also say YES – and you'll never know unless you ASK!
